

STid

Electronic Identification

RFID equipments & solutions

Specialized in contactless identification

www.stid.com

Identification specialist

- ▶ Founded in 1996, STid is specialized in contactless identification technologies using radio frequencies (RFID). We develop and manufacture equipments and solutions for people identification (access control), vehicle and object identification (traceability, logistic...).

Two lines of business: the same commitment

- ▶ **Products:** We develop and manufacture our readers to rigorous demands of performance, usability, visual quality and reliability to allow an optimal integration in your client applications.
- ▶ **Solutions:** As a partner in your projects we can help you to define the best solution to your identification needs by providing services from consulting to development and integration.

▶ People identification

- Access control
- Time management
- Cashless payment

▶ Vehicle identification

- Free-flow access control
- Control & vehicle fleet management

▶ Object identification

- Logistic applications
- Transports & distribution
- Process automation

A unique market approach

- ▶ To offer you the solution the most adapted to your needs, we have chosen to remain technologically independent. Thus STid is permitting you an access to large range of products covering all RFID technologies and frequencies. The freedom to choose the optimal solution for your unique situation.

A tradition of innovation

- ▶ Established as pioneer in RFID field, STid became the French market leader thanks to its ability to innovate beyond the existing solutions and to anticipate the technological breaks. Innovation remains the key point of our corporate culture.
- ▶ Thanks to its long and solid experience as well as the state of the art tools and materials, our R&D department is daily taking up the innovation challenge to provide you with the best suitable solutions.

An international network

- ▶ STid has developed a worldwide network of highly qualified distributors and integrators to bring the power of their solutions close to you.
