Splan joins the STid partner alliance to scale their hands-free solutions for visitors

Security Industry Group - June 2021

French security technology provider STid has announced a new strong entrant in its alliance partner network: Splan Inc. Visitor Management Solutions. Splan keeps the workplace safe and running smoothly with a multi-channel, mobile-enabled solution for visitor management. Splan will integrate STid's Architect® Blue QR Code Reader into their solution for visitor management.

The integration of STid technology offers SPLAN the following benefits:

- It enables identification of employees and visitors with multiple additional technologies: RFID, NFC and Bluetooth;
- It simplifies the management of temporary access in offices, parking lots or any other infrastructure.

STid Business Development Director Susana Gallegos explains: "**New factors are starting to become increasingly important when designing High-Security buildings. Nowadays, staff members are more concerned about having an exceptional experience at work and appreciate the building technology environment as a whole. Solutions must be user-**

friendly, have hands-free options and be fully integrated. STid Group and Splan are reinventing Access Control by providing a robust visitor management platform that allow users to interact simultaneously with Virtual Access Cards, QR Codes and RFID Cards on a single reader".

STid's Architect® Blue QR Code Readers are so called "multi-technology" readers. These readers support RFID, NFC, and Bluetooth® and are, in addition, equipped with a QR code / Barcode module to enable the identification of employees and visitors. Identification by QR code simplifies the management of temporary access in offices, parking lots or any other infrastructure.
