The Latest From Security Product Manufacturers

STid Spectre Nano Reader

The multi-technology Spectre nano reader from STid quickly recognizes employees, visitors, vendors, and their vehicles simultaneously for smooth, hands-free access control without compromising security. It reads windshield tags, key fobs, cards, smartphones, or wearables using UHF and Bluetooth to leverage end-user preferences for easier adoption. It is also part of the STid Mobile ID ecosystem, which turns smartphones into virtual cards for both vehicle and pedestrian access control.
